NuLA

Compass Group is actively contributing to the United Nations' sustainable development goals for 2030. To make as much positive impact as possible, we have established the NuLA platform which is based on three pillars: Environment, People & Society and Vitality. The NuLA platform helps us and our partners learn, innovate and collaborate to achieve our journey goal. It is our sustainable thinking for challenges such as poverty, inequality and the climate crisis. We take social responsibility with the goal of contributing to a better world, aiming for climate-positive services by 2030. The emphasis is on the letter 'U' where we urge every individual to treat the environment with care and support sustainable developments from now on. This sustainable thinking is woven into every concept, making the journey to a better world within our entire catering and service offering. The journey we take together is constantly changing, as we learn every day and sustainable initiatives are (re)developed.

#Storytelling NULA

NULA translates to zero. It represents our shared journey to make the world a better place. Many people think that sustainable development is only about the environment, but the concept is broader. In addition to the environment, social developments are very important for a sustainable society. With this, we want to achieve not only zero waste, but also, for example, zero loss of biodiversity and zero loss of talent. We do this with our knowledge of the hospitality sector, strong partnerships and equal relationships around the world, driven by our core values: sustainable, connecting, sincere, innovative and idiosyncratic. Our first journey goal? By 2030, all our meals and services are climate-positive and lead to improved well-being of planet, people and animals. And after 2030? The journey to make the world a better place will continue beyond 2030.

- Zero (food) waste - no waste. We are working on a circular supply where we reuse raw materials again and again and prevent (food) waste.
- Bio-diversity and regenerative agriculture - is about a way of working that increases biodiversity (the wealth of plants and animals). For example, regenerative agriculture, where farmers work within the limits of nature. Specifically, this means less use of manure, concentrate feed and pesticides.
- Short and transparent (food) chains - a short connection between the producer (e.g. the farmer) and the consumer. We offer honest, transparent and local products.

Dietary requirements

As a caterer, we can facilitate almost all of your dietary needs, if given at least 5 days in advance.

Almost all of our lunch services and buffets include vegetarian dishes. For other dietary requirements we charge a surcharge of 20% per person. We are forced to charge this surcharge because we need to purchase special products and we prepare and serve these products separately to avoid cross contamination.

We can also take into account dietary requirements regarding religious beliefs, such as Halal and Kosher. An additional surcharge will also apply for these products. Please contact our banqueting office for this at vu.order@compass-group.nl.
